NEW ONBOARD TRUCK RAMPS SAVES PORTABLE UNLOADER OWNERS TIME DURING SETUP

Morris, MN—October 19, 2012, Superior Industries, North America’s only combination manufacturer of conveyor systems and their related accessories, offers time-saving onboard truck ramps as a new option for its line of portable RazerTail® Truck Unloaders.

Packaged with the machine, these onboard ramps reduce setup time for owners by up to an hour. Without the new technology, earthen ramps are constructed so belly and end dump trucks can access the hopper. Over time, ramps made of earthen material can settle, requiring maintenance. In addition, each move of a Superior or competitor brand portable unloader requires these earthen ramps to be arranged or deconstructed; a process requiring up to an hour to complete.

According to Superior, the new onboard ramps unfold from their transport position in as little as five minutes. A loader or forklift operator simply connects chains or [.....read more](#)

LOEFFLER ENGINEERING GROUP ANNOUNCES ASME B20.1 COMMITTEE SELECTS NEW CHAIRPERSON!

Lago Vista, TX—Frank Loeffler, Loeffler Engineering Group, President, was elected as the new chairperson of the **ASME B20.1 Committee**. Frank’s term will be for three years.

The B20.1 Committee is the

“Safety Standard for Conveyors and Related Equipment” and is used by OSHA.

The B20.1 Committee works closely with CEMA and references the [CEMA Safety Label Brochure](#).

The committee is also working closely with R. Todd Swinderman, PE, **RtoddS Engineering, LLC**, on “Risk Assessment” to make sure that CEMA and ASME positions on this subject are in agreement.

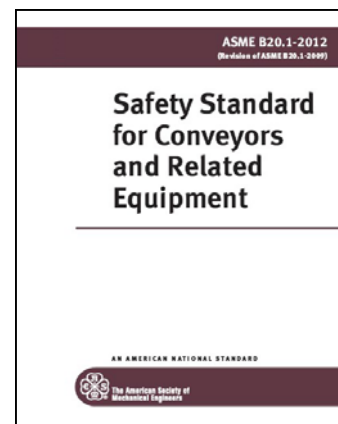

Quite a few B20 Committee Members are also members of the CEMA Safety Committee. The 2012 standard

has just been published and will become effective **March 28, 2013**. This standard was first issued in 1947.

Anyone interested in becoming involved on this committee or attending the next meeting, should contact Frank at:

Frank J. Loeffler, Jr. P.E.

*The next ASME B20.1 meeting will be **October 17, 2013**, in Miami, Florida.*

SPANTECH PLANS \$3.8 MILLION EXPANSION AT ITS GLASGOW, KENTUCKY PRODUCTION FACILITY

Area Development Online News Desk (10/19/2012)

Glasgow, KY – October 19, 2012, SpanTech, a manufacturer of custom conveyer systems used in the frozen food, baked goods, beverage and pharmaceutical industries, will invest \$3.8 million to add 55,500 square feet to its production facility and purchase new equipment as part of the expansion in Glasgow, Kentucky.

The company, which currently employs 66 people at its Glasgow facility at 1115 Cleveland Avenue, plans to add a new sorting division to support and diversify its customer base in the warehouse and distribution markets.

“The growth trend that SpanTech is experiencing is a direct result of the passionate and intelligent people who work together every day,” said SpanTech Executive Vice President Dan Nasato. “We are committed to building the best conveyor and sortation systems possible; it’s more than a goal, it’s how we do business. There is no limit to the growth we can achieve, because there are no limits to the human content and innovation of this company.”

“We’re excited to see SpanTech add 25 jobs while it continues to grow and succeed,” said Gov. Steve Beshear. “SpanTech is an inspirational company, starting small and growing into an international business. This partnership will help SpanTech remain a competitive force in the global marketplace.”

As an incentive to encourage the investment and job growth in Glasgow, the Kentucky Economic Development Finance Authority preliminarily approved the company for tax incentives up to \$500,000 through the Kentucky Business Investment program. The performance-based incentive allows a company to keep a portion of its investment over the term of the agreement through corporate income tax credits and wage assessments by meeting job and investment targets.

“SpanTech has been a valuable member of Glasgow’s manufacturing sector since 1978,” said Mayor Rhonda Riherd Trautman. “The upcoming expansion of facilities, operations and employees is very positive for Glasgow and we are thankful for their investment in our community. Starting as a small, locally owned company and reaching the level they have achieved by being a global supplier of conveyor systems demonstrates that innovation and quality production is alive and doing well in Glasgow.”

Eriez® New DensitySort® Brochure Focuses Sorting Nonferrous Fines by Gravity

Erie, PA – The Eriez® DensitySort® Air Table is featured in a new full-color, four-page brochure. The literature, available from Eriez in print and PDF format, highlights the economical DensitySort’s ability to recover 70 percent of red metals from nonferrous

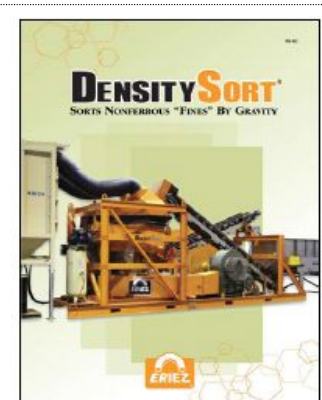

fines.

According to the brochure, the DensitySort uses air, vibration and slope to separate heavy and light fractions. Air is evenly distributed throughout the DensitySort’s air table decking to fluidize the material on the deck. DensitySort eliminates the need for

sand, water or filtration and delivers payback in as little as six months.

An illustration in the brochure shows the process of fines being.....[Read more](#)
